Kim,

I just wanted to follow-up the issue of how the Wolverine Technical team organization. Nuria, Erica and I were able to speak with Joan Tanaka, our branch chief, about Superfund's Remedial Program's role in regards to the Wolverine PFAS contamination. ~~in the short term. As it looks like~~ After the discussions with DEQ, it seems likely that either Water or LCD will lead EPA's involvement. As a result, I should not be identified as a co-lead for the ~~team~~ Wolverine core group (no reflection on how happy I am to work with you and the rest of the folks). I am going to be narrowly involved on the Tannery property, for the foreseeable future. We understand that the County may still request assistance from the Superfund Removal Program.

For our weekly calls with Michigan and our weekly team meetings, I will be the ~~only~~ Superfund Remedial rep, with Nuria and Erica being my alternates if I cannot participate on an individual meeting. I will reach out to David O'Donnell and make sure that ~~he understands~~ the extent of my involvement. Since he had invited me to participate in daily calls but I think it will be more appropriate if a Water or LCD technical person participates in these calls. I will be happy to make sure that happens smoothly.

Please contact me if you have any questions, and I look forward to working with you on this moving forward.

Michael
